Experienced Full Stack Developer with 2+ years of expertise in web, mobile, and server technologies. Proficient in both independent and collaborative projects, dedicated to enhancing user efficiency across various platforms. Committed to continuous learning and staying updated with industry trends in web, mobile, and server development.

WORK EXPERIENCE

Software engineer ThatMate

06/2021 - 09/2023

ThatMate is an EdTech organization focused on helping teens make informed choices about their physical, mental, and sexual health.

Achievements/Tasks

- Worked on Thatmate official Android app using React Native, to add new features to already existing app
- Worked as head of development for developing and maintaining web-based applications used by students in India and the USA. We mainly used React, Apollo graphql & Mantine UI for FrontEnd.
- I owned multiple full features (front-end+backend) of the website(Admin UI) used by the ThatMate content team to upload content to Android and web applications.

Training Assistant Geekster

02/2021 - 04/2021

An e-learning platform based out of Gurugram, Haryana.

Achievements/Tasks

- Implemented adaptive learning algorithms or recommended systems that cater to individual student needs, leading to improved learning outcomes.
- Trained over 150+ students, on "Data structures and algorithms".
- Preparing individual development plan and helping students achieve pre-defined goals.

EDUCATION

Bachelor of engineering East West Institute of Technology

08/2016 - 07/2020

Bengaluru, India

UI/UX Principles

Data structures and Algorithms

PERSONAL PROJECTS

Sweeter App

- Tech stack used: Next.js, NextAuth, Tailwind CSS, MongoDB, Vercel.
- we have Next.js API routes, Server Side Rendering (SSR) using SWR library Authentication Flows include passwordless login, Google and LinkedIn OAuth, Tailwind CSS and Headless UI for design and accessibility.
- You can create a user account, post new Sweets, follow and unfollow other users, and see their activities in your news feed.

Chat Application

- Tech stack used: React.js, charengine.io.
- The functionality of this chat application is to give the user ability to chat with whoever is online on the application.
- Direct message and Group chat are supported.

Parking space management system

- Tech stack use: React Native, Mongo DB.
- Solves the parking space management problem by helping Parking managers to maintain and check out the vehicles parked with ease.
- Random spot allocation when entered and Bill generated when the parked vehicle checks out are included.
- Initially it was android only application, after some months I have moved it into web based application for easy usage an installation.
